June 30, 2017

Dear Fellow Shareholders,

We are writing to update you on the liquidation of the Focused Credit Fund (the "Fund"). During the quarter, we continued to monetize portfolio positions with the goal of returning the Fund's remaining capital to shareholders as promptly as is reasonably practicable. In this regard, we have made significant progress and will make an additional liquidating distribution on or about July 12th, details of which will be made available on our website [www.focusedcreditfund.com](http://www.focusedcreditfund.com). Further details on the primary activity during the period and remaining investments are included below.

## Portfolio Update

### Liberty Tire Recycling LLC

The Fund sold all of its Liberty Tire position (Term Loan, 11% Notes and equity) at a reasonable discount to its carrying value in order to obtain near-term liquidity for shareholders, resulting in a \$0.07 decrease to the Fund's NAV. Other alternatives under consideration by Liberty Tire's Board and management would have taken far longer, may have produced a larger discount, and could have possibly resulted in the Fund receiving securities rather than cash, which would likely further delay realization. Thus, we identified a cash buyer and exited our entire position. Furthermore, this sale should help the Fund satisfy its Subchapter M diversification requirements for a longer period of time and not be subject to corporate level tax for the benefit of all shareholders.

### Longview Intermediate Holdings LLC

The Fund sold its Longview Power positions (equity, warrants, revolver commitment, and 12% notes) during the quarter. With wholesale electricity prices at low levels and no near-term increase predicted, combined with a variety of power plants in reorganization, Fund Management believed

that monetizing this investment at the present time was prudent given the potential for further downside risk in the volatile energy sector, in particular coal producers.

### Ideal Standard International S.A.

Ideal Standard represents the largest position remaining in the Fund. The maturity date on all of the Ideal Standard notes is May 1, 2018, and the company is exploring various re-financing and strategic options ahead of this maturity. The company's operational performance has been strong but, because of Ideal's complex capital structure, it is hard to predict what consideration the Fund might receive for its holdings in any future transaction involving the company. We continue to monitor the situation and will keep you updated on our progress as we work to maximize the net present value of the Fund's position.

## Additional Information

The Fund has now liquidated approximately \$660 million of investments, representing 85% of the NAV of the Fund measured as of the date of the approval of the Plan of Liquidation (December 9, 2015). When adding the Fund's previous liquidating distributions to the June 23 NAV of \$2.81, the total realized and unrealized value (remaining capital) amounts to \$6.38 per share. Fund Management has managed the portfolio in a manner which it believes has allowed the Fund to continue to meet the requirements of Subchapter M of the Internal Revenue Code. As long as the Fund continues to meet these requirements it should not be subject to federal income tax. There can be no assurance that the Fund will be able to comply with the Subchapter M requirements in the future.

We look forward to updating you on the status of the Fund next quarter.

## **THIRD AVENUE FUNDS**

### **Privacy Policy**

Third Avenue Focused Credit Fund (the “Fund”) respects your right to privacy. We also know that you expect us to conduct and process your business in an accurate and efficient manner. To do so, we must collect and maintain certain personal information about you. This is the information we collect from you on applications or other forms and from the transactions you make with us, our affiliates, or third parties. We do not disclose any information about you or any of our former customers to anyone, except to our affiliates (which may include the Fund’s affiliated money management entities) and service providers, or as otherwise permitted by law. To protect your personal information, we permit access only by authorized employees. Be assured that we maintain physical, electronic and procedural safeguards that comply with federal standards to guard your personal information.

### **Proxy Voting Policies and Procedures**

The Fund has delegated the voting of proxies relating to its voting securities to the Fund’s investment adviser pursuant to the adviser’s proxy voting guidelines. A description of these proxy voting guidelines and procedures, as well as information relating to how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, is available by August 31 each year (i) without charge, upon request, by calling (800) 443-1021, (ii) at the website of the Securities and Exchange Commission (the “SEC”) at <http://www.sec.gov>, and (iii) on the Fund’s website [www.focusedcreditfund.com](http://www.focusedcreditfund.com).

### **Schedule of Portfolio Holdings—Form N-Q**

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund’s Form N-Q is available on the SEC’s website at <http://www.sec.gov>, and may be reviewed and copied at the SEC’s Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

1 Includes redemption fees of less than \$0.01 per share.

2 Performance figures may reflect fee waivers and/or expense offset arrangement. Past performance is no guarantee of future results. In the absence of fee waivers and/or expense offset arrangement, the total return would have been lower. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period and is not annualized.

3 Not annualized.

4 Annualized.

5 As a result of an expense limitation, the ratio of expenses (exclusive of taxes, interest, brokerage commissions, acquired fund fees and expenses, and extraordinary items) to average net assets will not exceed 0.95%.

@ Calculated based on the average number of shares outstanding during the period.

# The Adviser waived all or a portion of its fees.

*The accompanying notes are an integral part of the financial statements.*

## Third Avenue Trust

### Third Avenue Focused Credit Fund

#### Notes to Financial Statements

April 30, 2017 (Unaudited)

#### 1. SUMMARY OF ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

##### Organization:

Third Avenue Focused Credit Fund (the "Fund") is a separate non-diversified (within the meaning of Section 5(b)(2) of the Investment Company Act of 1940) investment series of Third Avenue Trust (the "Trust"). The Trust, a Delaware business trust, is registered under the Investment Company Act of 1940 as an open-end management investment company. Third Avenue Management LLC (the "Adviser") provides investment advisory services to the Fund.

On December 9, 2015, the Trust's Board of Trustees (the "Board") adopted a plan of liquidation (the "Plan of Liquidation") for the Fund. Pursuant to the Plan of Liquidation, a cash distribution of \$69 million (the "First Liquidating Distribution") was paid to shareholders and the remaining assets of the Fund were contributed to a liquidating trust, FCF Liquidation Trust (the "Liquidating Trust"). Sales of Fund shares were terminated. Interests in the Liquidating Trust would then be distributed in-kind to Fund shareholders. Subsequent to the Board's adoption of the Plan of Liquidation, the Plan of Liquidation was modified (the "Modified Plan of Liquidation"). Pursuant to the Modified Plan of Liquidation, the First Liquidating Distribution was paid to Fund shareholders; however, the remaining assets which had been contributed to the Liquidating Trust were returned to the Fund which was to serve as the vehicle to liquidate the Fund's remaining assets. Pursuant to an exemptive order issued by the SEC on December 16, 2015, all redemptions in the Fund are suspended and subscriptions to the Fund are not accepted, retroactive to December 10, 2015. Effective December 10, 2015, the Adviser has waived its investment advisory and administration fees from the Fund. The Fund is currently in liquidation.

Below is a summary of all liquidating distributions, made after the adoption of the Modified Plan of Liquidation.

<u>Record Date</u>	<u>Pay Date</u>	<u>Institutional Class Distribution Rate Per Share</u>	<u>Investor Class Distribution Rate Per Share</u>	<u>Approximate Cash Amount</u>
12/9/15	12/16/15	\$0.58613	\$0.58613	\$ 69 million
6/14/16	6/15/16	0.54632	0.54632	64 million
11/7/16	11/8/16	0.25463	N/A*	30 million
11/28/16	11/29/16	1.18829	N/A*	140 million

\* On August 26, 2016, the Fund combined share classes so that all shares of the Investor share class were converted into shares of the Institutional share class.

##### Accounting policies:

The policies described below are followed consistently by the Fund in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Fund is an investment company and,

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

accordingly, follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board Accounting Standards Codification (“FASB ASC”) Topic 946-Investment Companies, which is part of U.S. GAAP.

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

#### **Security valuation:**

Generally, the Fund’s investments are valued at market value. Securities traded on a principal stock exchange, including The NASDAQ Stock Market, Inc. (“NASDAQ”), are valued at the last quoted sales price, the NASDAQ official closing price, or, in the absence of closing sales prices on that day, securities are valued at the mean between the closing bid and asked price. In accordance with procedures approved by the Board, debt instruments with maturities greater than 60 days, including floating rate loan securities, are valued on the basis of prices obtained from a pricing service approved by the Board or otherwise pursuant to policies and procedures approved by the Board. Forward foreign currency contracts valued independently by service providers based on pricing models are valued at the forward rate and are marked-to-market daily. Short-term cash investments are valued at cost, plus accrued interest, which approximates market value. Short-term debt securities with 60 days or less to maturity may be valued at amortized cost.

The Adviser has established a Valuation Committee (the “Committee”) which is responsible for overseeing the pricing and valuation of all securities held in the Fund. The Committee operates under pricing and valuation policies and procedures established by the Adviser and approved by the Board, including pricing policies which set forth the mechanisms and processes to be employed on a daily basis to implement these policies and procedures. In particular, the pricing policies describe how to determine market quotations for securities and other instruments. The Committee’s responsibilities include: 1) fair value determinations (and oversight of third parties used in the valuation process determinations), and 2) regular monitoring of the Adviser’s pricing and valuation policies and procedures and modification or enhancement of these policies and procedures (or recommendation of the modification of these policies and procedures) as the Committee believes appropriate.

Securities for which market quotations are not readily available are valued at “fair value,” as determined in good faith by the Committee as authorized by the Board, under procedures established by the Board. At April 30, 2017, such securities had a total fair value of \$159,974,591, or 34.63% of the Fund’s net assets. Among the factors that may be considered by the Committee in determining fair value are: prior trades in the security in question, trades in similar securities of the same or other issuers, the type of security, trading in marketable

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

securities of the same issuer, the financial condition of the issuer, comparable multiples of similar issuers, the operating results of the issuer and liquidation value of the issuer. See Fair Value Measurements below for additional detail on fair value measurements for financial reporting purposes. The fair values determined in accordance with these procedures may differ significantly from the amounts which would be realized upon disposition of the securities. Instability in the high yield and distressed credit market, which varies over time, makes it more difficult to obtain market quotations on certain securities owned by the Fund.

#### **Fair value measurements:**

In accordance with FASB ASC 820-10, Fair Value Measurements and Disclosures, the Fund discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. Fair value is defined as the price that the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1 — Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 — Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;
- Level 3 — Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in aggregate that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Fund. The Fund considers observable data to be market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

The following are certain inputs and techniques that the Fund generally uses to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with U.S. GAAP.

Equity Securities (Common Stocks and Warrants)—Equity securities traded in inactive markets and certain foreign equity securities are valued using inputs which include broker-dealer quotes, recently executed transactions adjusted for changes in the benchmark index, or evaluated price quotes received from independent pricing services or brokers that take into account the integrity of the market sector and issuer, the individual characteristics of the security, and information received from broker-dealers and other market sources pertaining to the issuer or security. To the extent that these inputs are observable, the values of equity securities are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

U.S. Government Obligations—U.S. Government obligations are valued by independent pricing services based on pricing models that evaluate the mean between the most recently quoted bid and ask price. The models also take into consideration data received from active market makers and broker-dealers, yield curves, and the spread over comparable U.S. Government issues. The spreads change daily in response to market conditions and are generally obtained from the new issue market and broker-dealer sources. To the extent that these inputs are observable, the values of U.S. Government obligations are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

Corporate Bonds & Notes—Corporate bonds and notes are generally comprised of two main categories: investment grade bonds and high yield bonds. Investment grade bonds are valued by independent pricing services or brokers using various inputs and techniques, which include broker-dealer quotations, live trading levels, recently executed transactions in securities of the issuer or comparable issuers, and option adjusted spread models that include base curve and spread curve inputs. Adjustments to individual bonds can be applied to recognize trading differences compared to other bonds issued by the same issuer. High yield bonds are valued by independent pricing services or brokers based primarily on broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector specific trends. To the extent that these inputs are observable, the values of corporate bonds and notes are categorized as Level 2.

## Third Avenue Trust

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

To the extent that these inputs are unobservable, the values are categorized as Level 3.

Forward Foreign Currency Contracts—Forward foreign currency contracts are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations, actual trading information and foreign currency exchange rates gathered from leading market makers and foreign currency exchange trading centers throughout the world. To the extent that these inputs are observable, the values of forward foreign currency contracts are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

Term Loans—Term loans are valued by independent pricing services based on the average of evaluated quoted prices received from multiple dealers or valued relative to other benchmark securities when broker-dealer quotes are unavailable. Inputs may include quoted prices for similar investments in active markets, interest rates, coupon rates, yield curves, option adjusted spreads, default rates, credit spreads and other unique security features in order to estimate the relevant cash flows which is then discounted to calculate fair values. To the extent that these inputs are observable, the values of term loans are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

The following is a Summary by Level of Inputs used to value the Fund's investments as of April 30, 2017:

#### Level 2: Other Significant Observable Inputs†

##### Investments in Securities:

###### Short-Term Investments:

U.S. Government Obligations \$199,960,556

Other (a)	1,337			
	\$188,064			

# Valuation techniques and significant unobservable inputs used by third-party pricing vendors or brokers, such as those described in Note 1, were not provided to the Adviser. The appropriateness of fair values for these securities is based on results of back testing, vendor and broker due diligence, unchanged price review and consideration of macro or security specific events.

(a) Includes securities less than 0.50% of net assets of the Fund.

\* Amount less than \$0.01.

The significant unobservable inputs used in the fair value measurement of the Fund's investments are listed above. Generally, a change in the assumptions used in any input in isolation may be accompanied by a change in another input. Significant changes in any of the unobservable inputs may significantly impact the fair value measurement. The impact is based on the relationship between each unobservable input and the fair value measurement.

## **Third Avenue Trust**

---

### **Third Avenue Focused Credit Fund Notes to Financial Statements (continued)**

April 30, 2017 (Unaudited)

Significant increases (decreases) in enterprise multiples may increase (decrease) the fair value measurement. Significant increases (decreases) in the discount for marketability may decrease (increase) the fair value measurement.

#### **Security transactions and investment income:**

Security transactions for financial statement purposes are accounted for on a trade date basis. Dividend income is recorded on the ex-dividend date or, for certain foreign dividends, as soon as the Fund becomes aware of the dividends. Interest income is determined on the basis of coupon interest accrued using the effective interest method which adjusts for amortization of premiums and accretion of discounts. Dividend income on the Statement of Operations are shown net of any foreign taxes withheld on income from foreign securities. Payments received from certain investments held by the Fund may be comprised of dividends, capital gains and return of capital. The Fund originally estimates the expected classification of such payments. These amounts may subsequently be reclassified upon receipt of information from the issuer. Realized gains and losses from securities transactions are recorded on an identified cost basis.

#### **Foreign currency translation and foreign investments:**

The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars as follows:

- Investments and assets and liabilities denominated in foreign currencies: At the prevailing rates of exchange on the valuation date.
- Investment transactions and investment income: At the prevailing rates of exchange on the date of such transactions.

The net assets of the Fund are presented at market values using the foreign exchange rates at the close of the period. The Fund does not generally isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of the investments held.

Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of investments sold during the period. Accordingly, realized and unrealized foreign currency gains/(losses) are included in the reported net realized gain/(loss) and unrealized appreciation/(depreciation) on investments transactions and balances.

Net realized gains/(losses) on foreign currency transactions represent net foreign exchange gains/(losses) from foreign currency exchange contracts, disposition of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amount of investment income and foreign

## **Third Avenue Trust**

---

### **Third Avenue Focused Credit Fund Notes to Financial Statements (continued)**

April 30, 2017 (Unaudited)

withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains/(losses) from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation/(depreciation) on the Statement of Assets and Liabilities. The change in net unrealized currency gains/(losses) for the period is reflected on the Statement of Operations.

Pursuant to U.S. federal income tax regulations, gains and losses from certain foreign currency transactions and the foreign currency portion of gains and losses realized on sales and maturities of foreign denominated debt securities are generally treated as ordinary income.

#### **Payment-in-kind securities:**

PIKs may make a payment at each interest payment date in additional debt securities. Those additional debt securities usually have the same terms, including maturity dates and interest rates, and associated risks as the original bonds. The daily market quotations of the original bonds may include the accrued interest (referred to as a "dirty" price) and require a pro-rata adjustment from the unrealized appreciation or depreciation on investments to interest receivable on the Statement of Assets and Liabilities.

For the period ended April 30, 2017, the total in-kind payments with respect to PIK securities that were received by the Fund in the amounts of \$12,030,721 or 79.77% of total investment income are shown as a separate line item on the Statement of Operations.

#### **Term loans:**

The Fund's investments in loans typically are structured and administered by a third party entity (the "Agent") that acts on behalf of a group of lenders that make or hold interests in the loan. These securities generally pay interest at rates which are periodically pre-determined by reference to a base lending rate plus a premium. These base lending rates are generally either the lending rate offered by one or more major European banks, such as the London Interbank Offered Rate ("LIBOR") or the prime rate offered by one or more major United States banks, or the certificate of deposit rate.

These securities are ordinarily contractually obligated to receive approval from the Agent bank and/or borrower prior to disposition. Remaining maturities of term loans may be less than the stated maturities shown as a result of contractual or optional payments by the borrower. Such prepayments cannot be predicted with certainty. The interest rate disclosed reflects the rate in effect on April 30, 2017.

#### **Forward foreign currency contracts:**

The Fund may be exposed to foreign currency risks associated with portfolio investments and therefore may use forward foreign currency contracts to hedge or manage these exposures. The

## Third Avenue Trust

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

change in market value is included in unrealized appreciation/(depreciation) on investments and foreign currency translations. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of forward foreign currency contracts does not eliminate fluctuations in the underlying prices of the Fund's portfolio securities, but it does establish a rate of exchange that can be achieved in the future. Although forward foreign currency contracts limit the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts.

During the period ended April 30, 2017, the Fund used forward foreign currency contracts for hedging foreign currency risks.

The following table presents the value of derivatives held as of April 30, 2017, by their primary underlying risk exposure and respective location on the Statements of Assets and Liabilities:

<u>Derivative Contract</u>	<u>Statement of Assets and Liabilities Location</u>	<u>Forward Foreign Currency Contracts</u>
<b>Assets:</b>		
Foreign currency contracts	Unrealized appreciation on forward foreign currency contracts	\$344,134

#### Summary of derivative information:

The following tables present the effect of derivatives on the Statement of Operations during the six months ended April 30, 2017, by primary risk exposure:

	<u>Amount of Realized Gain/(Loss) on Derivatives Recognized in Income</u>
<u>Derivative Contract</u>	<u>Forward Foreign Currency Contracts</u>
Foreign currency contracts	\$359,455(a)
	<u>Amount of Change in Unrealized Appreciation/(Depreciation) on Derivatives Recognized in Income</u>
<u>Derivative Contract</u>	<u>Forward Foreign Currency Contracts</u>
Foreign currency contracts	\$813,122(b)

(a) Included in "Net realized gain on foreign currency transactions".  
(b) Included in "Net change in unrealized appreciation/(depreciation) on translation of other assets and liabilities denominated in foreign currency".

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

#### Derivatives volume:

The tables below disclose the volume of the Fund's forward foreign currency contracts and options activities during the six months ended April 30, 2017 (amounts denominated in U.S. Dollars). Please refer to the tables in the Summary of derivatives information for derivative-related gains and losses associated with volume activity (measured at each month-end).

#### Forward Foreign Currency Contracts:

Average Settlement Value Purchased	\$ 273,038
Average Settlement Value Sold	90,346,887

#### Floating rate obligations:

The Fund may invest in debt securities with interest payments or maturity values that are not fixed, but float in conjunction with an underlying index or price. These securities may be backed by corporate issuers. The indices and prices upon which such securities can be based include interest rates and currency rates. Floating rate securities pay interest according to a coupon which is reset periodically.

#### Dividends and distributions to shareholders:

The amount of dividends and distributions paid to shareholders from net investment income and net realized capital gains on disposition of securities, respectively is determined in accordance with U.S. federal income tax law and regulations which may differ from U.S. GAAP.

Commencing with the First Liquidating Distribution, which was made on December 16, 2015, all distributions are intended to be part of a series of liquidating distributions which will result in the complete liquidation of the Fund. Reinvestment of liquidating distributions is not permitted.

#### Income tax information:

The Fund has complied with the requirements of the Internal Revenue Code applicable to regulated investment companies and intends to distribute all of its taxable net investment income and net realized capital gains, if any, to its shareholders. Therefore, no provision for U.S. federal income taxes is included on the accompanying financial statements. The Fund may, in the future, become a taxpayer if it determines it is in the best interests of the shareholders.

Income, including capital gains, from investments in foreign securities received by the Fund may be subject to income, withholding or other taxes imposed by foreign countries.

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

Management has analyzed the tax positions taken on the Fund's U.S. federal income tax returns for all open tax years (generally the current and prior three tax years), and has concluded that no provision for U.S. federal income tax is required in the Fund's financial statements. This conclusion may be subject to future review and adjustment at a later date based upon factors including, but not limited to, on-going analyses of and changes to tax laws, regulations and interpretations thereof. The Fund is subject to possible examination by the relevant taxing authorities for tax years for which the applicable statutes of limitations have not expired.

#### **Expense allocation:**

Expenses attributable to the Fund are charged to it. Expenses attributable to the Trust are generally allocated using the ratio of each series' average net assets relative to the total average net assets of the Trust. Certain expenses are shared with Third Avenue Variable Series Trust, an affiliated fund group. Such costs are allocated using the ratio of the series' average net assets relative to the total average net assets of each series of the Trust and Third Avenue Variable Series Trust.

#### **Trustees' and officers' fees:**

The Trust does not pay any fees to its officers for their services as such, except for the Chief Compliance Officer and the Associate Director of Compliance, to whom the Trust paid \$257,627, including \$30,694 from the Fund, for the six months ended April 30, 2017. The Trust does pay, together with Third Avenue Variable Series Trust, Trustees who are not "interested persons" (as defined in the Investment Company Act of 1940) of the Trust ("independent Trustee") a fee of \$5,000 for each meeting of the Board that each independent Trustee attends, in addition to reimbursing all independent Trustees for travel and incidental expenses incurred by them in connection with their attendance at meetings. If a special meeting is required, Trustees will each receive \$2,500. Prior to January 1, 2017, the Trust, together with Third Avenue Variable Series Trust, also paid each independent Trustee an annual retainer of \$65,000 (the lead independent Trustee received an additional retainer of \$12,000). Effective January 1, 2017, the annual retainer was reduced to \$55,000 and the additional retainer for the Chairman was set at \$20,000. The Trustees on the Audit Committee each receive \$2,000 for each audit committee meeting and the audit committee chairman receives an annual retainer of \$6,000. Effective March 2016, one of the Trustees began acting in an Advisory Trustee capacity. Prior to January 1, 2017, the Advisory Trustee received an annual retainer of \$32,500 and a fee of \$2,500 for each Board meeting the Trustee attends. Effective January 1, 2017, the annual retainer was reduced to \$27,500.

During the year ended October 31, 2016, the Third Avenue Focused Credit Fund Demand Review Committee and Third Avenue Focused Credit Fund Oversight Committee were established. Each Trustee who serves on both of these Committees is paid \$30,000 annually by

## Third Avenue Trust

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

the Fund, and each Trustee who serves only as a member of the Fund's Demand Review Committee is paid \$20,000 annually by the Fund.

#### 2. INVESTMENTS

##### Purchases and sales/conversions:

The aggregate cost of purchases and aggregate proceeds from sales and conversions of investments, excluding short-term investments, from unaffiliated and affiliated issuers (as defined in the Investment Company Act of 1940 as ownership by the Fund of 5% or more of the outstanding voting securities of these issuers) for the six months ended April 30, 2017 were as follows:

	<u>Purchases</u>	<u>Sales</u>
Affiliated	\$12,505,782	\$ 111,250
Unaffiliated	2,762,564	263,605,054

##### Unrealized appreciation/(depreciation):

The following information is based upon the book basis of investment securities as of April 30, 2017:

Gross Unrealized Appreciation	\$ 3,017,789
Gross Unrealized Depreciation	<u>(63,948,636)</u>
Net Unrealized Appreciation/(Depreciation)	<u>\$ (60,930,847)</u>
Book Cost	<u><u>\$448,955,543</u></u>

#### 3. INVESTMENT ADVISORY SERVICES, ADMINISTRATION AND SERVICE FEE AGREEMENTS AND EXPENSE OFFSET ARRANGEMENT

The Fund has an Investment Advisory Agreement with the Adviser for investment advice and certain management functions. The terms of the Investment Advisory Agreements provide that the Fund pay the Adviser an advisory fees at an annual rate of 0.75% based on the Fund's total average daily net assets. These fees are calculated daily and paid monthly. The Adviser has waived its advisory fees since December 10, 2015.

Additionally, the Adviser pays certain expenses on behalf of the Fund which are partially reimbursed by the Fund, including service fees due to third parties, the compensation expense for the Fund's Chief Compliance Officer and Associate Director of Compliance and other miscellaneous expenses. Effective December 10, 2015, the Fund no longer reimburses the Adviser for its share of the service fee expense. At April 30, 2017, the Fund had amounts payable to the Adviser of \$5,041 which included \$1,667 officers' fees and \$3,374 legal fees for

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

reimbursement of expenses paid by the Adviser.

Until March 1, 2018, whenever the Fund's normal operating expenses, including the investment advisory fee and most other operating expenses, but excluding taxes, interest, brokerage commissions, acquired fund fees and expenses, and extraordinary items, exceeded the expense limitation based on the Fund's average daily net assets, the Adviser has agreed to waive a portion of its advisory fees and/or reimburse the Fund in an amount equal to that excess. The expense limitations for the Fund are disclosed in the Financial Highlights. Effective December 10, 2015, the Adviser will not seek any recoupment from the Fund for previously waived and/or reimbursed expenses.

The Fund has entered into an Administration Agreement with the Adviser pursuant to which the Adviser, as administrator, is responsible for providing various administrative services to the Trust. The Adviser has in turn entered into a Sub-Administration Agreement with BNY Mellon Investment Servicing (U.S.) Inc. ("BNY Mellon") pursuant to which BNY Mellon provides certain of these administrative services on behalf of the Adviser. The Fund pays the Adviser a fee calculated at an annual rate of 0.0055% of the average daily net assets of the Fund for such services. The Adviser pays BNY Mellon an annual sub-administration fee for sub-administration services provided to the Trust equal to \$204,165, including \$20,940 related to the Fund. The Adviser has waived its administration fees since December 10, 2015.

Both the Fund and the Adviser have entered into agreements with financial intermediaries to provide record keeping, processing, shareholder communications and other services to customers of the intermediaries investing in the Fund and have agreed to compensate the intermediaries for providing those services. Certain of those services would be provided by the Fund if the shares of each customer were registered directly with the Fund's transfer agent. Accordingly, prior to December 10, 2015, the Fund had agreed to reimburse a portion of the intermediary fees paid by the Adviser pursuant to provisions adopted by the Board. The Fund paid a portion of the intermediary fees attributable to shares of the Fund not exceeding the estimated expense the Fund would have paid its transfer agent had each customer's shares been registered directly with the transfer agent instead of held through the intermediary accounts. The Adviser pays the remainder of the fees. The fees incurred by the Fund are reflected as shareholder servicing fees in the Statements of Operations. The Adviser has waived the Fund's commitment to share in such expenses since December 10, 2015.

The Fund has an expense offset arrangement in connection with its custodian contract. Credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. The expense reduction amount due to this arrangement for the six months ended April 30, 2017 was \$7,870, and the amount is reflected as "Expenses reduced by custodian fee expense offset arrangement" in the Statement of Operations.

Certain employees of the Adviser serve as members of the board of directors of companies in which the Fund has investments. As a result of such service, for the six months ended April 30, 2017, the Fund received \$57,500 in board member fees from these companies that board

## Third Avenue Trust

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

members employed by the Adviser agreed to have paid directly to the benefit of the Fund. These fees are included in “Other Income” on the accompanying Statement of Operations.

#### 5. CAPITAL SHARE TRANSACTIONS

The Fund is authorized to issue an unlimited number of shares of each class of beneficial interest with \$0.001 par value. The Fund is not issuing new shares, and redemptions in the Fund are currently suspended pursuant to an order from the SEC.

On August 26, 2016, the Fund combined share classes so that all shares of the Investor share class were converted into shares of the Institutional share class.

Transactions in capital stock were as follows:

	For the Period Ended April 30, 2017		For the Year Ended October 31, 2016	
	Institutional Class		Institutional Class	
	Shares	Amount	Shares	Amount
Shares sold	—	\$ —	2,857,103	\$ 21,058,499
Shares Issued upon reinvestment of dividends and distributions	—	—	2,240,677	14,900,504
Shares redeemed*	—	—	(48,024,503)	(348,307,495)
Shares converted from Investor Class	—	—	38,497,997	528,269,076
Net increase/(decrease)	—	\$ —	(4,428,726)	\$ 215,920,584

\* Redemption fees are netted with redemption amounts.

Prior to December 9, 2015, the Fund charged a redemption fee of 2%, for shares redeemed or exchanged for shares of another series of the Trust within 60 days or less of the purchase date.

#### 6. COMMITMENTS AND CONTINGENCIES

At April 30, 2017, the Fund had the following commitments and contingencies:

Issuer	Type	Amount of Commitment	Funded Commitment	Value of Segregated Cash
Longview Power, LLC	Revolver	\$ 1,250,000	\$ 900,000	\$ 350,000

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred.

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

In 2016, the Fund became party to various derivative, securities class action and books and records lawsuits.

In 2016, the Adviser became party to various derivative and securities class action lawsuits.

In settlement of these lawsuits, the Adviser, the Fund and certain claimants have entered into agreements that would require the Adviser to pay the Fund \$25 million (using its own capital and insurance proceeds) and the Fund would then pay certain former and present shareholders a total of \$14.25 million in full settlement of all claims raised in the litigations. The Adviser believes that final approvals of these settlements are likely. The Fund will recognize a gain as a result of these settlements. The amount to be paid by the Adviser will not affect the Adviser's ability to fully perform its investment advisory and other services to the Fund or the Trust.

#### 7. RISKS RELATING TO CERTAIN INVESTMENTS

##### **Foreign securities and emerging markets risk:**

Foreign securities from a particular country or region may be subject to currency fluctuations and controls, or adverse political, social, economic or other developments that are unique to that particular country or region. Therefore, the prices of foreign securities in particular countries or regions may, at times, move in a different direction from those of U.S. securities. From time to time, foreign capital markets may exhibit more volatility than those in the U.S., and the securities markets of emerging market countries can be extremely volatile. Emerging market countries can generally have economic structures that are less diverse and mature, and political systems that are less stable, than those of developed countries, and, as a result, the securities markets of emerging market countries can be more volatile than more developed markets may be.

##### **High yield and distressed risk:**

The Fund's investments in high-yield debt securities (commonly known as "junk bonds") and distressed securities may expose the Fund to greater risks than if the Fund only owned higher-grade securities. The value of high-yield, lower quality securities is affected by the creditworthiness of the issuers of the securities and by general economic and specific industry conditions. The prices of high yield securities can fall in response to negative news about the issuer or its industry, or the economy in general to a greater extent than those of higher rated securities. Issuers of high-yield securities are not as strong financially as those with higher credit ratings, so the securities are usually considered speculative investments. These issuers are more vulnerable to financial setbacks and recession than are more creditworthy issuers, which may impair their ability to make interest and principal payments. The Fund may also invest in distressed securities, which the Adviser considers to be issued by companies that are, or might

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

be, involved in reorganizations or financial restructurings, either out of court or in bankruptcy. The Fund's investments in distressed securities typically may involve the purchase of high-yield bonds, bank debt or other indebtedness of such companies.

#### **Debt securities risk:**

The market value of a debt security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The debt securities market can be susceptible to increases in volatility and decreases in liquidity. Increases in volatility and decreases in liquidity may be caused by a rise in interest rates (or the expectation of a rise in interest rates), which are at or near historic lows in the United States and in other countries. During periods of reduced market liquidity, the Fund may not be able to readily sell debt securities at prices at or near their perceived value. If the Fund needed to sell large blocks of debt securities to meet shareholder redemption requests or to raise cash, those sales could further reduce the prices of such securities.

Prices of bonds and other debt securities tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect debt securities and, accordingly, will cause the value of the Fund's investments in these securities to decline. When interest rates fall, the values of already-issued securities generally rise, although investments in new securities may be at lower yields. The prices of high-yield debt securities ("junk bonds"), unlike investment grade securities, may fluctuate unpredictably and not necessarily inversely with changes in interest rates.

The rates on floating debt instruments adjust periodically with changes in market interest rates. Although these instruments are generally less sensitive to interest rate changes than fixed rate instruments, the value of floating rate loans and other floating rate securities may decline if their interest rates do not rise as quickly, or as much, as general interest rates. An unexpected increase in Fund redemption requests, including requests from shareholders who may own a significant percentage of the Fund's shares, which may be triggered by market turmoil or an increase in interest rates, could cause the Fund to sell its holdings at a loss or at undesirable prices and adversely affect the Fund's share price and increase the Fund's liquidity risk, Fund expenses and/or taxable distributions. Economic and other developments can adversely affect debt securities markets.

#### **Market risk:**

Prices of securities have historically fluctuated. The market value of a security may decline due to general market conditions that are not related to the particular company, such as real or perceived adverse economic conditions, changes in the outlook for corporate earnings, changes

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect the particular company, such as management performance, financial leverage, and reduced demand for the company's products or services, or factors that affect the company's industry, such as labor shortages or increased production costs and competitive conditions within an industry. The value of the Fund will similarly fluctuate and you could lose money.

#### **Liquidity risk:**

Liquidity risk exists when particular investments are difficult to sell. The Fund may not be able to sell these investments at the best prices or at the value the Fund place on them. In such a market, the value of such investments and a Fund's share price may fall dramatically, even during periods of declining interest rates. Investments that are illiquid or that trade in lower volumes may be more difficult to value. The market for high-yield debt securities ("junk bonds") may be less liquid and therefore these securities may be harder to value or sell at an acceptable price, especially during times of market volatility or decline. Investments in foreign securities tend to have greater exposure to liquidity risk than U.S. securities. Liquidity can decline unpredictably in response to overall economic conditions or credit tightening. Investments in private debt instruments, restricted securities, and securities having substantial market and/or credit risk may involve greater liquidity risk.

#### **Counterparty risk:**

The Fund is exposed to counterparty risk, or the risk that an institution or other entity with which the Fund has unsettled or open transactions will default. The potential loss to the Fund could exceed the value of the financial assets recorded in the Fund's financial statements. Financial assets, which potentially expose the Fund to counterparty risk, consist principally of cash due from counterparties and investments. The Adviser seeks to minimize the Fund's counterparty risk by performing reviews of each counterparty and by minimizing concentration of counterparty risk by undertaking transactions with multiple customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Fund has received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

At April 30, 2017, the Fund had counterparty concentration of credit risk primarily with JPMorgan Chase Bank, N.A.

The Fund is a party to International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") with select counterparties that govern transactions, over-the-counter derivatives and foreign exchange contracts entered into by the Fund and those counterparties. The ISDA Master Agreements contain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of

## Third Avenue Trust

---

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements of the Fund.

The considerations and factors surrounding the settlement of certain purchases and sales made on a delayed-delivery basis are governed by Master Securities Forward Transaction Agreements (“Master Forward Agreements”) between the Fund and select counterparties. The Master Forward Agreements maintain provisions for, among other things, initiation and confirmation, payment and transfer, events of default, termination, and maintenance of collateral.

The counterparty risk associated with certain contracts may be reduced by master netting arrangements to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Fund’s overall exposure to counterparty risk with respect to transactions subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

#### **Collateral requirements:**

For derivatives traded under an ISDA Master Agreement and/or Master Forward Agreement, the collateral requirements are typically calculated by netting the mark-to-market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Fund and the counterparty.

Cash collateral that has been pledged to cover obligations of the Fund and cash collateral received from the counterparty, if any, is reported separately on the Statement of Assets and Liabilities as cash pledged as collateral and cash received as collateral, respectively. Non-cash collateral pledged by the Fund, if any, is noted in the Schedule of Investments. Generally, the amount of collateral due from or to a party has to exceed a minimum transfer amount threshold (e.g. \$500,000) before a transfer is required, which is determined at the close of business of the Fund and any additional required collateral is delivered to/pledged by the Fund on the next business day. Typically, a Fund and its counterparties are not permitted to sell, re-pledge or use the collateral they receive. To the extent amounts due to the Fund from its counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. The Fund attempts to mitigate counterparty risk by entering into agreements only with counterparties that it believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties.

For financial reporting purposes, the Fund does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statement of Assets and Liabilities.

## Third Avenue Trust

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

At April 30, 2017, the Fund's derivative assets and liabilities (by type) on a gross basis are as follows:

	Assets	Liabilities
Derivative Financial Instruments:		
Forward Foreign Currency Contrats	\$ 344,134	\$ —
Total derivative assets and liabilities in the Statement of Assets and Liabilities	<u>344,134</u>	<u>—</u>
Derivatives not subject to a master netting agreement or similar agreement ("MNA")	<u>—</u>	<u>—</u>
Total derivative assets and liabilities subject to a MNA	<u>\$ 344,134</u>	<u>\$ —</u>

The following tables present the Fund's derivative assets by counterparty net of amounts available for offset under a MNA and net of the related collateral pledged by the Fund as of April 30, 2017:

Counterparty	Amount of Assets Subject to a MNA by Counterparty	Derivatives Available for Offset <sup>1</sup>	Non-cash Collateral Received <sup>2</sup>	Cash Collateral Received <sup>2</sup>	Net Amount of Derivative Assets <sup>3</sup>
JPMorgan Chase Bank N.A.	\$ 344,134	\$ —	\$ —	\$ (344,134)	\$ —

1 The amount of derivatives for offset is limited to the amount of assets and/or liabilities that are subject to a MNA.

2 Excess of collateral received from the individual counterparty may not be shown for financial reporting purposes.

3 Net amount represents the net amount receivable from the counterparty in the event of default.

### Loans and other direct debt instruments:

The Fund invests in loans and other direct debt instruments issued by corporate borrowers. These loans represent amounts owed to lenders or lending syndicates (loans and loan participations) or to other parties. Direct debt instruments may involve a risk of loss in case of default or insolvency of the borrower and may offer less legal protection to the Fund in the event of fraud or misrepresentation. In addition, loan participations involve a risk of insolvency of the lending bank or other financial intermediary. The markets in loans are not regulated by federal securities laws or the SEC.

### Cash concentration:

The Fund's cash balance is held at a major regional U.S. bank. The Fund's cash balance, which typically exceeds Federal Deposit Insurance Corporation insurance coverage, subjects the Fund to a concentration of credit risk. The Fund regularly monitors the credit ratings of this financial institution in order to mitigate the credit risk that exists with the balances in excess of insured amounts.

## Third Avenue Trust

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

#### **Off-balance sheet risk:**

The Fund invests in derivatives which may represent off-balance sheet risk. Off-balance sheet risk exists when the maximum potential loss on a particular investment is greater than the value of such investment as reflected in the Statement of Assets and Liabilities.

#### **Focused investing:**

The Fund holds a relatively concentrated portfolio that contains fewer securities and invests in fewer industries than the portfolios of other mutual funds. Holding a relatively concentrated portfolio may increase the risk that the value of the Fund could decrease because of the poor performance of one or a few investments. Concentrated positions may be difficult to liquidate.

### **8. FEDERAL INCOME TAXES**

Prior to the December 9, 2015 adoption of the Plan of Liquidation, the amount of dividends and distributions paid by the Funds was based upon the Fund's net investment income and net realized capital gains. These amounts are determined in accordance with U.S. federal income tax law and regulations which may differ from U.S. GAAP. Distributions paid by the Fund after the adoption of the Plan of Liquidation will generally be treated as part of a series of liquidating distributions for U.S. federal income tax purposes.

Dividends and distributions, including liquidating distributions, are recorded by the Fund on the ex-dividend date. In order to present accumulated undistributed net investment income (loss), accumulated net realized gain (loss) on investments and foreign currency transactions and capital stock on the Statement of Assets and Liabilities that more closely represent their tax character, certain adjustments have been made. "Book/tax" differences are either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their tax-basis treatment. Temporary differences do not require reclassification. Permanent differences are primarily due to reclassification of certain transactions involving foreign securities and currencies, and partnerships, the difference in the treatment of amortization of discount on certain debt instruments, certain derivative instruments and other book to tax adjustments. Net investment income (loss), net realized capital gain (loss) on investments and foreign currency transactions and net assets were not affected by these changes.

As of October 31, 2016, Third Avenue Focused Credit Fund has a capital loss carryforward as follows:

## Third Avenue Trust

### Third Avenue Focused Credit Fund Notes to Financial Statements (continued)

April 30, 2017 (Unaudited)

#### Capital Losses incurred in a post-enactment year

	<u>Short-Term</u>	<u>Long-Term</u>	<u>Total</u>
Year-ended Oct. 31, 2015	\$ 89,657,034	\$217,650,552	\$307,307,586
Year-ended Oct. 31, 2016	\$ 75,379,494	\$378,176,547	\$453,556,041
Total	<u>\$165,036,528</u>	<u>\$595,827,099</u>	<u>\$760,863,627</u>

The Regulated Investment Company Modernization Act of 2010 generally allows capital losses incurred in a taxable year beginning after December 22, 2010 (“post-enactment year”) to be carried forward for an unlimited period to the extent not utilized. Post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses.

#### 9. SUBSEQUENT EVENTS

Pursuant to the Modified Plan of Liquidation, a cash distribution of approximately \$118 million was paid to the Fund’s shareholders on May 16, 2017 (the “Fifth Liquidating Distribution”). The Fifth Liquidating Distribution of \$1.00 per share was paid to shareholders of record of the Fund as of May 15, 2017. Internal Revenue Service Form 8937 - Report of Organizational Actions Affecting Basis of Securities, providing further detail with respect to the tax treatment of this distribution to the Fund’s shareholders, has been posted to the Fund’s website at [www.focusedcreditfund.com](http://www.focusedcreditfund.com).

### Third Avenue Focused Credit Fund Schedule of Shareholder Expenses (Unaudited)

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, such as redemption fees; and (2) ongoing costs, including management fees, shareholder servicing fees, distribution fees (if applicable) and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Although the Fund is no longer charging redemption fees or paying management fees, shareholder servicing fees, or distribution fees, this example is required to be included pursuant to SEC rules.

The example is based on an investment of \$1,000 invested at the beginning of the period, November 1, 2016 and held for the six month period ended April 30, 2017.

#### Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During the Period” to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Class’ actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as redemption fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The example also assumes all dividends and distributions have been reinvested.
